

GE DID NOT BRING GOOD THINGS TO OUR LIVES.

“GE’s two nearby factories dumped PCBs into the Hudson River. I grew up in a home contaminated with PCBs. My father and I both have PCBs in our blood. I’ve suffered from horrible skin sores. My daughter has learning disabilities. I’m scared.”

— Tammy, West Glens Falls, NY

GE’s dumping of PCBs in the Hudson River Valley is the problem. Immediate PCB cleanup is the solution. The EPA has created a cleanup plan. But GE wants to block it. Now President Bush must decide.

Doctors, scientists and public health officials agree: PCB’s are linked to cancer, reproductive and developmental defects, neurological disorders, and skin conditions.

**PRESIDENT BUSH:
NO MORE DELAYS.**

**GE CEO JACK WELCH:
DO THE RIGHT THING.**

**Follow the EPA’s plan. GE must
clean up the Hudson now.**
